means healthier babies and stronger families and that is an accomplishment worthy of our praise and admiration.

Katherine Esterly grew up in Norristown, PA, knowing that she wanted to work with children. After graduating from Temple University's medical school in 1951, she moved to Delaware to work towards that goal. Delaware was truly blessed when she made this decision.

Despite her diminutive size and warm personality, Dr. Esterly has always approached her efforts to care for Delaware's babies with a steel will and an unwillingness to accept "no" for an answer. She demands high standards from her colleagues and has lived her life by this same commitment to excellence.

One of the hallmarks of her care is how she continually goes above and beyond the traditional role of simply caring for the newborn child. She uses a gentle hand and an open style of communication to develop a level of trust with parents that greatly improves their hospital experience during such difficult times. Whether it is a reassuring word or a simple explanation of a complex procedure, Kitty is always willing to do whatever it takes to assure parents that their newborn is receiving the best possible care.

Katherine Esterly became a practicing pediatrician in 1954 after completing her internship and residency at the Delaware Hospital. Dr. Esterly then served as an associate in pediatrics for the Children's Bureau of Delaware from 1954 until 1968. During this time, Kitty worked tirelessly to help adoptive and foster children. In 1968, because of her outstanding record of leadership and her dedication to her profession, she was named director of this organization.

After the merger of community hospitals in Wilmington in 1967, the Medical Center of Delaware was formed and a new department of pediatrics was created. Unfortunately, there wasn't a neonatologist on staff at this new institution. Dr. Esterly took the initiative to get the necessary training so she could fill this void in the department's neonatal intensive care unit. She went on to become the director of the neonatology division in 1975. Throughout the 1980s, Dr. Esterly expanded the division and added additional full-time neonatologists to her staff, resulting in a world-class practice where even the sickest of newborns could be cared for.

Dr. Esterly also advanced the cause of nurses by working with colleagues and government officials to highlight and promote the qualifications of professional nurses. Her actions led to nurse practitioners being able to treat patients and write prescriptions, which greatly reduces the workload of practicing physicians and allows for greater responsibility on behalf of nurses.

In addition, Katherine Esterly helped create a neonatal nurse practitioner program for schools in Delaware and New Jersey that continue to train the next generation of caregivers. Her ability and willingness to share her knowledge has ensured that future generations will continue the work that Kitty pioneered so many years ago.

In 1995, while serving as Governor of Delaware, I appointed Dr. Esterly to serve as the chair of Delaware's Perinatal Board. In this capacity, she spearheads Delaware's efforts to promote the health and welfare of countless numbers of children. The First State and her children are better off because of her efforts.

Most recently, the Katherine L. Esterly Nursing Education Scholarship fund was established for the College of Health Sciences at the University of Delaware. When asked if she would allow her name to be used to distinguish this scholarship, Dr. Esterly, in her customary selfless fashion, not only agreed but also made a personal contribution to the very fund that now bears her name. Her generosity will help ensure that her legacy of caring for Delaware's youngest residents will be preserved and passed on to future generations of caregivers.

Kitty's dedication and innovation in the field of neonatology serves as an example to us all. I rise today to honor her achievements and to thank her on behalf of all Delawareans for her years of hard work, dedication, and constant championing of Delaware's youngest residents •

## RECOGNITION OF THE UNIVERSITY OF NORTHERN IOWA

• Mr. HARKIN. Mr. President, on Wednesday, the American Association of Colleges for Teacher Education will present its Best Practice for Collaboration with a Community College Award to the University of Northern Iowa. This award recognizes outstanding collaboration between a university teacher education program and a community college—in this case, Des Moines Area Community College. This partnership is a wonderful example of two fine educational institutions working together to meet the needs of schools in rural Iowa, and I congratulate them for this accomplishment

Eleven years ago, UNI joined forces with the DMACC campus in Carroll to develop a new approach to address the unique needs of rural school districts. The idea was simple—locate a teacher preparation program where you have the need. Instead of training teachers 160 miles away on its campus in Cedar Falls, UNI established a joint program with DMACC in the heart of rural western Iowa.

Rural communities face many unique challenges, including the need to recruit highly qualified teachers. At the same time, many rural residents have a need to upgrade their skills, but are unable to move to a larger community to attend college. The 2+2 program is a perfect solution. This homegrown approach allows individuals to obtain the training they need to fill the jobs that are literally in their own backyards.

Since 1995, UNI has awarded baccalaureate degrees to nearly 100 teachers at the Carroll campus. It is very important to point out that nearly all of these individuals continue to live in western Iowa, and are working for school districts in the surrounding area.

This program has been an enormous success and I am very proud to have secured Federal funding from the U.S. Department of Education to support this innovative program. UNI is building on this experience and will be expanding the 2+2 model to other fields of study, including technology management, general business and criminology. The University will also expand the partnership to include Western Iowa Tech Community College in Sioux City, Northeast Iowa Community College in Peosta and Calmar, Eastern Iowa Community College in Davenport, and Iowa Western Community College in Council Bluffs.

The success of this project is due to the creative energy and hard work of many individuals from UNI, DMACC and the community of Carroll including: Dr. Constantine Curris, former President of UNI; Dr. Joe Borgen, former President of DMACC; Dr. Robert Koob, President of UNI; Dr. Robert Denson, President of DMACC; Dr. Richard Hawkes, Professor of Teaching at UNI; Dr. Roger Kueter, Director of Community College Projects at UNI; Dr. Jim Knott, Provost of the DMACC Carroll campus; Steve Schultz, coordinator of the 2+2 program for DMACC; Art Neu, former mayor of Carroll and former Lieutenant Governor of the State of Iowa; and Jim Wilson, publisher of the Carroll Daily Times Her-

I extend my congratulations to all of them on this outstanding achievement. ullet

## IN MEMORY OF WILLIAM R. ROBERTSON

• Mrs. BOXER. Mr. President, I am deeply saddened to inform you of the passing of Bill Robertson, former secretary treasurer for the Los Angeles County Federation of Labor, AFL-CIO. I would like to take a few moments to recognize Bill Robertson's many important accomplishments and the tremendous impact he made on the labor movement.

Born in St. Paul, MN, Bill Robertson was a man with humble beginnings. He lost both his parents when he was a child and lived in an orphanage for a brief period. Growing up in difficult circumstances in the middle of the Great Depression shaped Bill's social and personal beliefs. He intimately understood the struggle that working men and women faced to achieve dignity in the United States.

Bill led the Los Angeles County Federation of Labor for nearly two decades. During his tenure, he fought for the rights of working people with passion and great success. In 1975, Bill
